Dear Tim,

## QUOTATION Elc 010817

Thank you for asking Elc contractors ltd to quote on replacement boardwalk at the Millennium Green. On visiting the site and agreeing the approach for the way forward to replace the boardwalk and handrail (which had not been quoted for in the estimate of last December) please find my costs as follows.

To uplift and dispose of all of boardwalk and supporting frame and hand rails.

To supply and fit new timbers to match where possible existing specification with treated timber.

75mm sq timber posts HCD – Incised treated for longer life.

75 mm sq timber bearers UC4 treated.

1.2m wide 200mm x 48 mm timber deck planks.(These are 8 mm thicker than the existing on site, we are unable to source 40 mm boards.. the nearest size is 38mm which I consider to be too thin for the purpose ) UC4 treated

3.6 m long x 88 x 38mm sawn rails (guard rail) UC4 treated

1.8 m long 75mm x 75mm sawn square combination post for moat side bearer and hand rail support HCD – Incised for longer life.

20mm wire mesh stapled to surface layer for anti slip.

All fixings galvanised or zinc plated.

**At £18045.00 plus vat**

Yours sincerely

Adrian Bytom  
Director
